Not illustrated. 1919 Excerpt: . and are relatively free from adhering iron and quartz impurities, so that the log washer and jigs produce a highgrade shipping ore containing about 40 per cent of metallic manganese. Some of the deposits seem to be isolated and may be found here and there in a belt a few hundred feet wide and five-eighths of a mile long. In the cuts already worked the ore is not known to have definitely disappeared within a depth of 50 feet and it is probably that it continues much deeper. The following analyses show only the general character of the ore and ore deposit. Analyses of sample Hu-371x is given only to show the freedom from accessory elements and impurities sometimes found in other deposits. It does not represent the regular shipping product which is strictly high-grade manganese ore. Analyses of ferruginous manganese ore and deposits. County...
