While the year s work cannot show such important syntheses as those of atropine and nicotine, accomplished during the preceeding year, many investigations of great importance fall to the credit of last year. The constitution of some alkaloids, for example, that of ricinine, has been completely established. The researches of Knorr and others upon the constitution of morphine are bringing this important problem very near to its solution. The relations between the other opium alkaloids and the constitution of some of them, e.g., apomorphine are also being cleared up. The constitution of conhydrine and of the different coniceines also promises to be very soon worked out. The identity of lupinidine with sparteine was shown by Willstadter and his collaborators. Papaverine and cotarnine received a great deal of attention last year and many interesting derivatives of these bases were prepared by various investigators. New color reactions for the indentification of some alkaloids were discovered...
