Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1922 Excerpt: . . . The score on the Stanford test is fair evidence of this ability, and in cases of doubt the achievement on particular oral problems in that examination were studied. 4. Correlations Between Vocabulary, Reading And Other Tests In The Higher Grades In order to discover whether the relations between the various vocabulary and reading tests found among pupils just beginning to read are similar to those among pupils whose reading habits are fairly well established, the correlations shown in Table XX were computed. TABLE XX Correlations Between Variables As Indicated By Headings. N 40 Pupils Of Grades VII And VIII The correlation between the two visual vocabulary tests (0.82) is the same as that found in the lower grades (See Table XIX). The correlations between the visual vocabulary tests and reading are lower in the upper grades; about 0.54 as compared to 0.65 for...
