Accountability Office, 2010 OCLC Number: (OCoLC)645687281 Subject: Cloud computing --Government policy -- United States. Excerpt: . . . and subject to interpretation. While several other organizations have developed definitions of cloud computing, many of the elements of these definitions are encompassed in the NIST definition. Cloud computing is further defined by its service and deployment models. There are three service models: infrastructure as a service, platform as a service, and software as a service (see fig. 1). Infrastructure as a service provides various infrastructure components such as hardware, storage, and other fundamental computing resources. Platform as a service provides a service that runs over an underlying infrastructure. A platform vendor offers a ready-to-use platform, such as an operating system like Microsoft Windows or Linux, which runs on vendor-provided infrastructure. Customers can build applications on a platform using application development frameworks, middleware capabilities, and functions such as databases. Software as a service runs on an underlying platform and infrastructure managed by the vendor and provides a self-contained operating environment used to deliver a complete application.

Reviews

Absolutely essential go through publication. It is filled with knowledge and wisdom Once you begin to read the book, it is extremely difficult to leave it before concluding.

-- Dr. Sierra Lowe Sr.

This book is very gripping and exciting. I was able to comprehended everything out of this written e publication. You will not truly feel monotony at at any time of your respective time (that's what catalogs are for concerning should you question me).
